THE WONDERS STILL AWAITING

# TWO WORLDS

In one world we dream  
Only in one we live

On this journey of wonders  
Forever we'll live in one  
One of two...

Once we found a spark in us  
Enough to let us survive  
Rise up and illuminate  
Gave way to journeys

A bright future's history  
Jules Verne and Tomorrowland  
Sweet dreams shine so silvery  
In our newfound glory

How can all these dreams prevail  
It's such a fragile hope  
Cause a spark can give such light but also burn it all

And forever on this journey  
We were close to the wonders still awaiting us  
And forever in this universe  
We can only live in one of two worlds

One of two worlds  
One of two worlds

Something never leaving us  
The wolf still among the sheep  
Fake news cover bloody hands  
And they still want more

Around every corner now  
Orwell's next dystopia  
Is this world the closer one  
Chosen over wonders?

How can all these dreams prevail  
It's such a fragile hope  
Cause a spark can give such light but also burn it all

And forever on this journey  
We were close to the wonders still awaiting us  
And forever in this universe  
We can only live in one of two worlds

Only one

Two Worlds are waiting in twilight of time  
Last bridge between them is slowly becoming frail

Searching, dreaming, creating, killing  
Consciousness Failing  
Wake up. get up  
This is not a movie fantasy

Rise up, fall down  
We'll have to choose the way we go  
Now

How can all these dreams prevail  
It's such a fragile hope  
Cause a spark can give such light but also burn it all

And forever on this journey  
We were close to the wonders still awaiting us  
And forever in this universe  
We can only live in one of two worlds

One of two worlds  
One of two worlds  
One of two worlds  
One of two worlds

# REBORN

For I gave my heart  
Laid it on the ground to die  
Holding one last spark  
For my dream to stay alive

Raise me up all the way  
From this cold winter day

I will not give up  
I will not stand down  
I try to find my way  
It's never enough  
I close my eyes now  
There is no turning back  
It's the end but I'll be reborn  
I will be reborn

Wipe this blood away  
But the stains will always stay  
See this heart, this heart is beating still  
Reborn in a moment in time

Raise me up all the way  
From this cold winter day

I will not give up  
I will not stand down  
I try to find my way  
It's never enough  
I close my eyes now  
There is no turning back

It's the end but I'll be reborn  
I will be reborn

Somnium immolatus est

Silent waters breaking in my heart  
Shadowed passion coming back to life

You will never take it from me now  
You will not destroy what I lived for  
You will never force me to sell my soul  
I will not give up on my freedom

Rising up all the way  
From this hell

I will not give up  
I will not stand down  
I try to find my way  
It's never enough  
I close my eyes now  
There is no turning back  
It's the end but I'll be reborn  
I will be reborn

I'll be reborn

I will not stand down  
I will be reborn

# YOU WILL NEVER BE OUR GOD

I see the writings on the wall  
Your prophecies are going to fall  
by Fire

I've been in hell for many years  
And all the time is lost for me, for eternity  
I try to take back what was mine  
A prison they have made my mind, my enemy

"March in Line"  
"The end of time"  
You will never be our saviour  
I won't die terrorized  
You will never be our god

They tried to break my will to live  
Another life where I can be, can be myself

Why? Is this the only way for us?  
Turn your eyes away  
But all the pain will stay

Write your name across their graves  
We'll tell their tales  
We'll not forget  
For we will defy this fate until we die

"March in Line"  
"The end of time"  
You will never be our saviour  
I won't die terrorized  
You will never be our god

No more hate disguised by grace  
You'll no longer blind our eyes now  
No more lives sacrificed  
You will never be our god

I see the writings on the wall  
Your prophecies are going to fall  
by Fire

Sanctum Mendacium

"March in Line"  
"The end of time"  
You will never be our saviour  
I won't die terrorized  
You will never be our god

No more hate disguised by grace  
You'll no longer blind our eyes now  
No more lives sacrificed  
You will never be our god

# THE WONDERS STILL AWAITING

Hold me, embrace me, come take me away with you  
Lead me and show me the wonders beyond this world

I will cross the mountains and seas  
We will always be one  
This was the last time I looked back on my life  
Before it fell apart

Fly far away  
Goodbye, until your last day  
See the stars  
Hear the melodies play  
The notes that show us the way

You will guide my way back from here  
Where I lost my old dream  
Come, you whisper silently into my ears  
To Neverworld again

Fly far away  
Goodbye, until your last day  
See the stars  
Hear the melodies play  
The notes that show us the way

Once we were traveling places  
Now we'll discover some new lands

Fly far away  
Goodbye, until your last day  
See the stars  
Hear the melodies play  
The notes that show us the forgotten way

The notes that show us the way

# GHOSTS

Into the starlit unknown  
Until the end we follow  
Nothing but shadows  
We will never return

So many worlds I have yet to unveil  
Feel like the only survivor  
I don't belong here, just want to escape  
Higher and higher

I just want to be lost in space  
and never come back

Knowing I will not return in the end  
Never Oh never

I just want to be lost in space and time  
and never come back

Follow me up to the stars  
Leaving the world and the lies far behind me  
There's not regret in my heart  
Crawling my way, crawling my way back to life

Into the starlit unknown  
Until the end we follow  
Nothing but shadows  
We will never return

Enter the void that these wounds left inside  
Nothing can grow in these shadows  
Reaching a place that is closer to light  
Far from sorrows

I just want to be lost in space and time  
and never come back

Follow me up to the stars  
Leaving the world and the lies far behind me  
There's not regret in my heart  
Crawling my way, crawling my way back to life

Earth and the moon and the sun are my only guide  
I long to live in the space between infinity

They will fade  
They became the ghosts of my past

Follow me up to the stars  
Leaving the world and the lies far behind me  
There's not regret in my heart  
Crawling my way, crawling my way back to life  
Way back to life

Into the starlit unknown  
Until the end we follow  
Nothing but shadows  
We will never, no, never return

## YOUR STORIES I'LL REMEMBER

I have walked this path with you until you've gone on your own  
And I hope you've heard me still when I have said farewell  
You will always be a part of what I have become  
And whenever I close my eyes I think back of this time

All these moments I'll remember  
All the stories that you've shared with me  
I will never get to hear your voice again  
But they'll stay with me

I have kept a place for you always inside of my heart  
And each day that's passing by it's where I'll keep you alive  
You will always be a part of what I have become  
And whenever I close my eyes I think back of this time

All these moments I'll remember  
All the stories that you've shared with me  
I will never get to hear your voice again  
But they'll stay  
All these Summers never ending  
They have gone and I am left in here  
I will never get to hear your voice  
But they will always stay with me  
They'll always stay

You've been there for me in times of darkness and regrets  
I just wished we could have stayed like this

All of the dreams that you have been chasing  
All of the paths that you have been walking  
All of the scars from war and losses  
But you kept on going

All that you've given with all of your heart  
Through sorrow and pain but never gave up  
I want to thank you for all that you've done  
You have always been a home  
Always been a home

All these moments I'll remember  
All the stories that you've shared with me  
I will never get to hear your voice again  
But they'll stay  
All these Summers never ending (I'll remember)  
They have gone and I am left in here

I will never get to hear your voice  
But they'll always stay  
They will always stay  
With Me

## MY CURSE IS MY REDEMPTION

I'm on my way, but still it stays

I'm walking in silence  
For no-one to see  
There's nowhere to go from here  
Nowhere for me

I have been waiting  
For someone to wake me up  
From a nightmare that I can't leave behind

So I can rise  
Above the blackened skies  
To forgotten lands

I'm on my way  
The way from unforgiving hell  
But still it stays  
My neverending farewell  
For thousand memories  
I still can feel the reflexion  
A thousand times  
My curse is my redemption

Only a stranger  
In a world that is strange to me  
Oh I wish I'd understand

I tried to run away from here  
So I can rise  
Above the blackened skies  
To forgotten lands

I'm on my way  
The way from unforgiving hell  
But still it stays  
My neverending farewell  
For thousand memories  
I still can feel the reflexion  
A thousand times  
My curse is my redemption

I turn my pain into bliss  
And in these notes I can speak to you finally

In the end I return  
With something in my hands so beautiful

I will rise again  
Above the blackened skies  
To forgotten lands

I'm on my way  
The way from unforgiving hell  
But still it stays  
My neverending farewell  
For thousand memories  
I still can feel the reflexion  
A thousand times  
My curse is my redemption

My curse is my redemption  
My curse is my redemption

# ILLUSION IS THEIR NAME

We came a long way from home  
And we still wonder where home might have been  
There's no sign of heaven  
No answers coming from lies they tell  
No burning in hell  
Their words are not saving us

Poison spreading worldwide  
All the way  
Seeking ways to blind us  
We have only one more chance

Unchain your voice inside the flames  
Illusion is their name

We have been holding the key  
And I won't give up my life anymore  
To slavery of your kind  
We have been waiting so long to be free  
To finally see  
The truth of this grand design

Chaos rising worldwide  
Culture shifting backwards  
We have only one more chance

Unchain your voice inside the flames  
Unchain  
Their story is all the same  
Illusion is their name

Forever they pray  
Forever obey  
Cursed we are  
Truth is defined and replaced by cults  
We know it's time  
Revolution

All the signs  
We've been too blind to see  
Our world will fall apart  
There's no time left to wait

Unchain your voice inside the flames  
Unchain  
Their story is all the same  
Illusion is their name

We'll unchain  
Revolution will come

# PARADISE

Consume me now  
Break all your vows

Our world falls apart  
Our hope has to die  
I've been trapped into immense solitude  
In this nature abused  
I let her scars decide on my path  
Until then I close my eyes

Consume me now  
Break all your vows  
It's been so hard to keep us alive  
You will survive no matter what for us  
To destroy you one more time

We have stolen your home  
Now your grave is set in stones  
Our existence was a mistake for you  
If only we could have shared  
We've stepped on you we've made you into  
This deathlike paradise

Consume me now  
Break all your vows  
It's been so hard to keep us alive  
You will survive no matter what for us  
To destroy you one more time

All our mistakes will be washed away  
But they will always stay her fate

Consume me now  
And bury the pain  
Just take it away  
Break all your vows  
There is no return from this hell

# MIRROR OF TIME

I still haven't found that peace in me  
I wish we could live one other day

I could never say how much I cared  
In the end there's nothing left  
But so much I do regret

Don't look away  
The end is coming close  
You can't escape  
This cold mirror it holds

The mirror of time  
As our reflection will just decline  
Leaving a black hole inside  
All that we've never said and done  
All that we've lost and become

All these choices been leading me here  
While the dreams I've left to die  
Haunting me now as I close my eyes  
It haunts you now, you cannot escape

Don't look away  
The end is coming close  
You can't escape  
This cold mirror it holds

The mirror of time  
As our reflection will just decline  
Leaving a black hole inside  
All that we've never said and done  
All that we've lost and become

Face your mistakes  
Your own lies  
Your own grave  
Dead, buried in vain  
Nothing ever lasts eternally

I'm on my way  
I'm on this road that never ends  
We'll never see  
We'll never know or understand

The mirror of time  
As our reflection will just decline  
Leaving a black hole inside  
All that we've never said and done  
See all that we've lost

Will you feel your regrets?  
Will you have any regrets?

Face your fate  
Face your life  
Face your death  
Face your fate  
Face your life  
Face your death  
Your own death

# SCARS

All of my life I've been trying to be free  
From all the darkness trapped deep inside of me

Nothing ever changes, all these moments passing by  
Will these demons ever leave my mind

Always chose the pain to comfort my heart  
Never been the kind to trust anyone  
Pretense has always been my art  
So they never can take me down

Out of all the dreams I always had to hide  
They're falling into place they're coming all in time  
I've found my fate  
But I can still feel my pain

Nothing ever changes, all these moments passing by  
Will these demons ever leave my mind

It's not enough - to push it all away  
It's not enough - to play all these games  
How can we let go  
And embrace the scars in our soul  
I know they will always last  
It's not enough  
Not enough, all of the things forever lost

Nothing ever changes  
all these moments passing by  
Will these demons ever leave my mind

It's not enough - to push it all away  
It's not enough - to play all these games  
How can we let go  
And embrace the scars in our soul  
I know they will always last  
It's not enough

It's never enough

# THE MAIDEN AND THE CHILD

I'll be waiting for the moment coming  
And then I'll be fighting, til the end I'm running  
I will cross the water I will search forever  
And I won't forsake you, I just keep on living  
To save us

I will return to the life I once have left behind  
Taken from us to be just a plaything in this horror divine  
All along in the night you have been my guiding light  
Only when I close my eyes

No turning back - to your poisoned lies  
No more regret - I've unbound my ties  
I will be there  
Waiting for you  
I'll be fighting til the end  
To save us

What they call sin is the bond I have been holding once  
Make no mistake I won't let go  
I'll walk through the ashes of my holy war

All along in the night you have been my guiding light  
Only when I close my eyes And in return I will come to  
save your soul even if they take my life  
I've seen my end over and over now

I don't believe your lies  
For all you've done we're going to testify  
I don't accept your bribes  
We're gonna see you all falling down

I'll be waiting for the moment coming  
And then I'll be fighting, til the end I'm running  
I will cross the water I will search forever  
And I won't forsake you

No turning back - to your poisoned lies  
No more regret - I've unbound my ties  
I will be there  
Waiting for you  
I'll be fighting til the end  
I will be there  
Waiting for you  
I'll be fighting til the end  
To save us

# ASTÉRIA

Falling down from the sky fate will come  
Bringing death and sorrow

I came from far away to save my soul  
To flee this war I have always known  
Followed paths away from this  
The guns, the suffering  
This is not the homeland that we need  
bleeding in vain

Poverty - Enemies - Our Destiny  
Their prophecies always lead to slaughtering

All of this pain  
Bound to your life  
You call for the gods  
In the end we will fall down  
Ta mystika tou kosmou (The secrets of the world)  
Einai i klironomia mas (Are in our heritage)  
In the end we will fall down

We sing a song for you who try to survive  
Your story'll live on for eternity  
Always running through your veins no matter  
where you go  
All the stars align to who you are  
Guiding you back

Poverty - Enemies - Our Destiny  
Their prophecies always lead to slaughtering

All of this pain  
Bound to your life  
You call for the gods

Einai i klironomia mas (Are in our heritage)  
In the end we will fall down

No-one, Nowhere  
There is no messiah waiting for  
No-one, Nowhere  
No-one, Nowhere  
Only his sword  
No-one knowing  
Will it ever stop its killing

All that we've left behind, all that we've lost in the flames  
Our legacy will stay alive only if we can change  
War into peace, and hate into seeing that we all are one

One in our blood  
One in our tears  
One in all our sorrows  
One in our dreams  
One in our joys  
In our hopes we carry

Poverty - Enemies - Our Destiny  
Their prophecies always lead to slaughtering

And this wheel keeps turning

All of this pain  
Bound to your life  
You call for the gods  
In the end we will fall down  
Ta mystika tou kosmou (The secrets of the world)  
Einai i klironomia mas (Are in our heritage)  
In the end we will fall down
